

PROFESSIONAL SERVICES

Development projects

WHEN SHOULD YOU BE INTERESTED IN OUR SERVICES?

If you always wanted to support your employees with innovative methods and interesting workflows, applications and solutions in their daily work! We have experience in the development of social intranets, video integrations, translation tools, knowledge management, enterprise search as well as in the implementation of Greenfield projects. For our customers we provide a variety of different solutions. We use the experience we gain to make your project successful and are gladly passing on the results and learnings to you. We support you in the selection, evaluation and use of frameworks and programming languages that we use ourselves in our projects.

HERE IS AN OUTLOOK OF OUR FRONT- AND BACK-END DEVELOPMENTS:

Social Intranet

- Support with the introduction and implementation of your social intranet project (Jive, Office 365)
- Implementation of PoC's (proof of concepts)
- Assumption of project management tasks in software development
- Frontend adaptations to your CI (corporate identity)
- Backend integration of existing systems (media libraries, Outlook, Lotus Notes, BI tools)
- Data migration
- Integration of cloud services
- 3rd level support

Video Integration

- Integration of existing video services
- Implementation of Kaltura / Movingimage video services

Translation tools

- Integration of translation services (DeepL, Google, Bing) into the Social Intranet

Knowledge Management

- Integration and Support for SmarterPath
- Integration of SmarterPath into existing Social Intranet
- 3rd level support

Enterprise Search

- Introduction and implementation of an Enterprise Search (Intergator)
- Integration of different data sources
- Adjustments of the search algorithms

Greenfield Projekte

- Consulting and Support - Software Architecture
- (Microservices, AWS, Azure, Pivotal)
- Technology selection
- Project Management (agile)
- Prototyping & Implementation
- Testing & Documentation
- Support

SUCCESS STORIES:
