

DIGITAL WORKPLACE BOOSTER - OFFICE 365

Deploy Office 365 and Microsoft teams quickly, effectively, and across the board.

Office 365 promises more productivity through the new way of collaboration in teams and in the Office 365 Sharepoint.

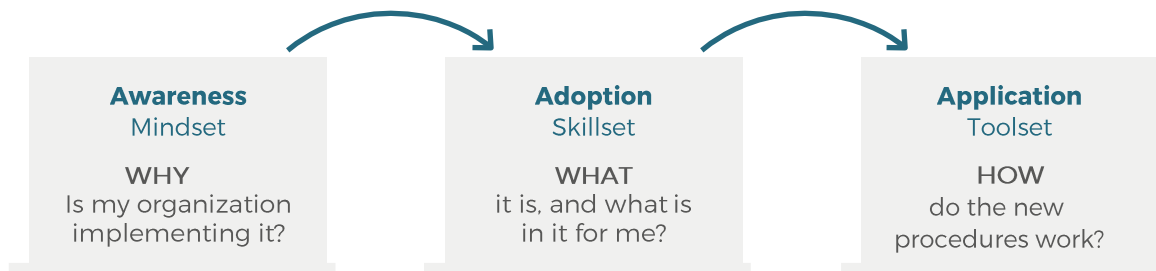

Numerous studies on enterprise social networks have shown that employees can increase their productivity ("role specific tasks") with enterprise social networks and intranets, such as Microsoft Office 365 , by 25% if these social networks are used correctly; this is especially achievable with Microsoft teams.

In theory, this is true, but many roll-outs fail and remain in the first stage of data migration from servers in the cloud and setting up the intranet. The desired return-on-investment does not occur or occurs later than expected.

A key success factor is that employees are familiar with the new system and are able to operate it.

So that your employees "know and know" the new system, we offer you our proven Workplace Booster APPs.

Pokeshot's Workplace Booster APPs ensure that employees can take advantage of Office 365 and Microsoft teams quickly and effectively. After passing through the three stages, employees know why the system makes sense, what it can do, and they can use it.

This avoids unnecessary costs for extensive training, re-training and loss of productivity due to insufficient or incorrect use. The system is rapidly evolving from a pure document management and sharing platform to a value-added solution that gives organizations a head start on the digitalization path and allows employees to use the new solution effectively and efficiently.

Companies benefit from a fast, area-wide and effective launch of Office 365 by using SmarterPath Wizards and SmarterTour Online Help as active performance support.

These contain:

- 12 months license to use SmarterPath for the introduction of Office 365 and the accompanying processes up to 30 learning paths and wizards.
- 15 Use cases in Office 365 Wizards for the introduction, work and use of Microsoft teams and other Office 365 APPS.
- 13 tours for the introduction of MS teams (interactive online help directly in the system and learning in one).

Optional components:

- the creation of further individual wizards and learning paths, depending on the size and wishes of the company.
- Depending on the size and wishes of the company, support with installation, customizing, training, webinars and other launch services.

DIGITAL WORKPLACE BOOSTER - OFFICE 365

Deploy Office 365 and Microsoft teams quickly, effectively, and across the board.

Number	Office 365 Launch Booster Deliverables	<= 1.000 User	1.000 - 3.000 User	3.000 - 10.000 User	Enterprise License
12	Months License - Office 365 Booster License - Software as a Service incl. Updates. *	9.480 €	17.800 €	29.800 €	Individual pricing

Service	Packages adaptable according to company size and structure	Starter	Package S	Package M	Package L
Packages	Workshops, installation support, customizing, training, adjustments Number of person days depending on size Starter = 2 / S = 4 / M = 7 / L = 12	2.320 €	4.640 €	8.120 €	13.920 €

Depending on the number of users, this results in an average investment of € 0.25 to € 0.79 per user per month (at maximum number of users in the categories). This in turn saves a multiple of training, retraining and helpdesk costs. In addition, the return on investment for the investment in Office 365 and Microsoft teams is significantly earlier.

All packages can be extended at any time (upgrade licenses, number of paths, services, creation of individual tours, wizards and paths).

Companies often upgrade the Office 365 Booster after the introduction to the unlimited SmarterPath license (unlimited paths) to drive and improve efficiency and effectiveness other business use cases, such as onboarding, sales, service, process wizards, projects etc. This establishes an Office 365 integrated Workplace Learning and Knowledge Management. Upgrade: <https://pokeshot.com/suite>

All prices plus 19% VAT. 30 days net term of payment. Status: January 2020
